SCRIPT:

a=33 b=200

if a>b:

print("a is greater than b") else:

print("b is greater than a")

The screenshot shows a Python IDE with a dark theme. The editor window displays a Python script named 'main.py' with the following code:

```
a=33
b=200
if a>b:
    print("a is greater than b")
else:
    print("b is greater than a")
```

The output console at the bottom shows the execution of the script, displaying the output 'b is greater than a' and the message 'Process finished with exit code 0'.
